1. Introduction

Evac Group provides a comprehensive range of technologies, empowering its customers' sustainable operations both in the maritime and building industries. Evac's offering provides solutions for water and waste management, freshwater generation, and marine growth prevention and corrosion protection.

1.1 Purpose and Scope

This Evac Group's environmental policy outlines our principles and commitments for minimizing the environmental impact of our operations, products, and services. It also defines our expectations and responsibilities for our employees, suppliers, customers, and other stakeholders to support our environmental goals.

This policy applies to all our business lines, units, locations, and activities worldwide. This policy is reviewed regularly and revised as necessary to reflect changes in our business environment. It is communicated to all employees and made available to the public on our website.

Evac Group Leadership Team is accountable for the implementation of this policy and for ensuring that sustainability and environmental topics are integral parts of our business strategy and operations.

All managers and supervisors are responsible for ensuring that this policy is followed in their areas of responsibility.

All employees are expected to adhere to this policy and to report any incidents or observations they identify.

2. Evac Environmental Policy

At Evac, we are committed to enhancing our customers' green transition for the benefit of their business and the entire planet. Our purpose as a company is to enable a future with no waste.

Evac's environmental stewardship is strategically aligned with the key material topics, guided by our sustainability program and our pledge to advance the UN Sustainable Development Goals (SDGs). We channel our efforts across the entire Evac Group.

We advance circular economy and environmentally responsible consumption by offering products that are durable, upgradeable, and which consume less energy and water, as well as our services for maintaining and renewing them. We drive transition to circular economy in the maritime industry.

We foster a culture of environmental awareness and responsibility among our employees and stakeholders. We are committed to educating and providing training to our personnel on environmental aspects.

We select and source materials, which are safe, sustainable, and ethically obtained, and we do not use any harmful substances. We provide guidance and support to our manufacturing partners on these matters.

We aim to reduce the amount of greenhouse gases (GHGs) and pollutants we emit in our operations and throughout the value chain.

We support the UN Sustainable Development Goals that are relevant to our activities and have signed the UN Global Compact.

We continuously improve our environmental practices through the ISO 14001 Environmental Management System and by systematic reporting and monitoring on how well we are doing environmentally. We annually set site specific environmental targets, on the top of the commonly agreed sustainability targets, for certified Evac sites.

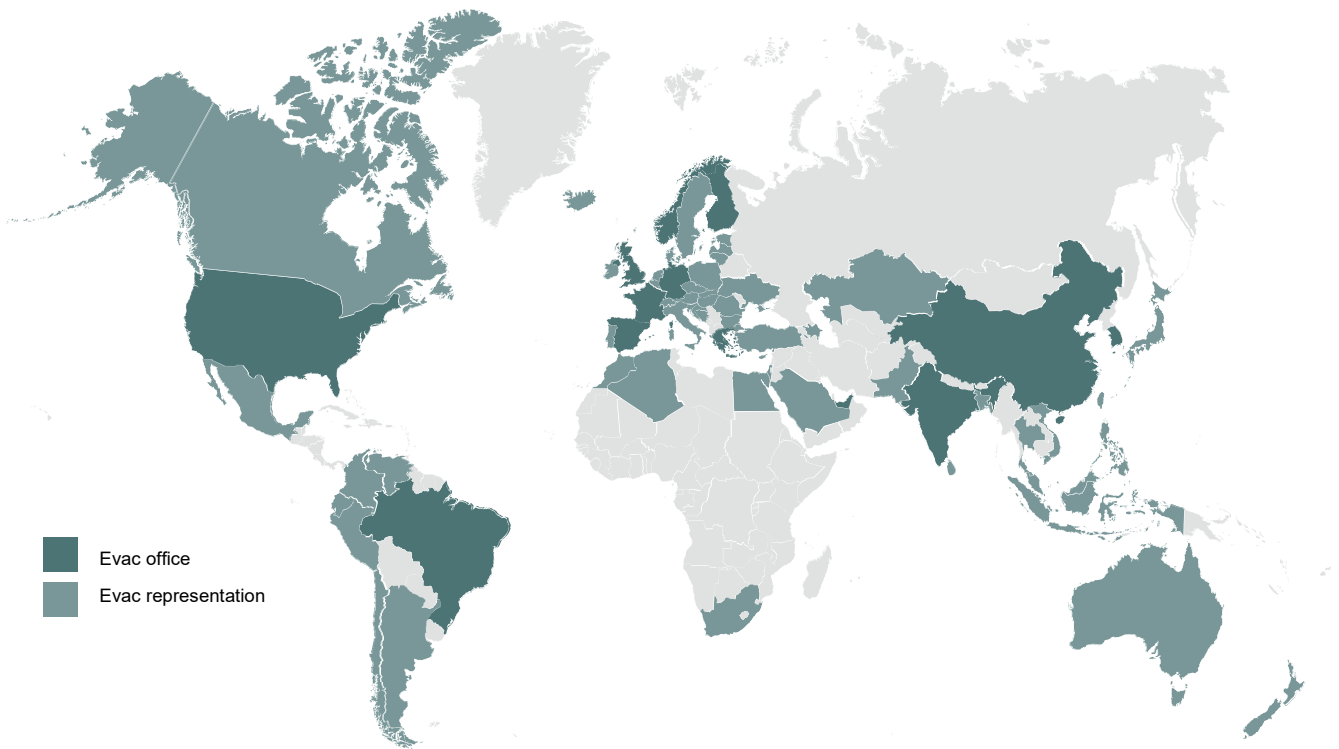

We follow all the relevant laws and regulations, our own company values, and any optional programs that we choose to join, whichever are more rigorous.

June 2024

Björn Ullbro
CEO of Evac Group

Revision history

REV. NO.	DESCRIPTION	AUTHOR	APPROVER	DATE
1	First release	Matti Tervo	Mikko Leino	Jan 2021

Fresh water generation

Vacuum systems

Wastewater treatment

Wet waste treatment

Dry waste treatment

Marine growth prevention

Corrosion protection

Evac is the world's leading provider of integrated water and waste management systems, as well as corrosion-protection systems for the marine, offshore, and building industries. With offices in 14 countries across four continents and representatives in more than 70 countries, we are close to our customers wherever they are. We contribute to a better environment and cleaner seas by helping our customers eliminate waste, conserve water, and mitigate emissions. Our ambitious target is to enable a future with no waste.
